

The Art and Science of Dental Pharmacology & Therapeutics

What you need to know in 2009

Course Date: October 3-4, 2009

- Helping You Avoid Dangerous Drug Interactions
- Oral Sedation
- Bisphosphonates
- ...And Much More

With Our Course You Will Feel Confident!

SOUTH BEACH
DENTAL INSTITUTE

Course Information

The Art and Science of Dental Therapeutics
Saturday - Sunday, October 3 – 4, 2009

Treat confidently, with a gentle touch

As the States and Provinces in North America become more concerned with sedation techniques and react with new Guidelines and Standards requiring dentists to attend pertinent continuing education courses to maintain their licenses, only two things are missing --- the availability of such courses and sufficiently trained faculty to present them. There is also the growing need in our profession to continually update the strategies and techniques required to safely manage and treat patients with complex medical conditions and subsequent drug therapies. It is the mission of Med WoRx and the South Beach Dental Institute to meet these needs by presenting appropriate courses given by recognized qualified faculty.

“We all need to be updated for the same reason we have to renew lifesaving courses on an annual basis. Our memory changes things. Because this is one area you can get into real trouble if you do it poorly, you need to refresh your memory.” ~ Dr. Fred Quarnstrom

This two-day course is designed for everyone: general practitioners, specialists, oral and maxillofacial surgeons, hygienists, and dental assistants. Sedation and Pharmacology Dentistry covers all aspects of inhalation analgesia, including the best methods for dealing with anxiety control. Participants will learn the latest techniques during an interactive, all-day session that meets the requirements for nitrous oxide re-certification. If you use any form of inhalation analgesia in your office, or are considering it, this course will remove any doubt in your abilities.

Course Schedule

The Art and Science of Dental Therapeutics
Saturday - Sunday, October 3 – 4, 2009

*Day 1 - Saturday October 3, 2009**

- 7:30 a.m. Breakfast and Registration
- 8:00 a.m. Pharmacology 101 - A Review and Update

About

Jason H. Goodchild D.M.D.

Dr. Jason H. Goodchild is a graduate of Dickinson College in Carlisle, Pennsylvania. He received his dental training at the University of Pennsylvania School of Dental Medicine where he still holds a faculty position as an Assistant Clinical Professor in the Department of Oral Medicine. As part of his training and service in the Department of Oral Medicine he was educated in enteral sedation and completed numerous cases at the dental school and the Hospital of the University of the University of Pennsylvania. As a part of his faculty duties he treats patients with complex medical histories, and oversees students and residents. He is also Assistant Professor and Director of the Division of Oral Diagnosis in the Department of Diagnostic Sciences at the New Jersey Dental School. He teaches the next generation of dentists excellence in patient care, and introduces the concepts of enteral sedation to fourth-year dental students in the classroom. He is currently studying for his Masters of Dental Science degree and has research underway looking at new enteral sedation medications. Dr. Goodchild has published numerous articles and spoken to many State Dental Boards on the topic of enteral sedation dentistry. He has been as invited speaker for the Academy of General Dentistry and American Association for Dental Examiners. He is a reviewer for the Journal of the American Dental Association and Quintessence International. He has also served as a grant reviewer for the National Institute of Health.
